

Phase-7 Hospital Management System – API Limits

API Limits

- Salesforce tracks the number of API calls made by external systems or integrations.
- In the Hospital Management System, core operations such as Doctor and Patient management, Appointment scheduling, and Billing are all performed inside Salesforce.
- No external APIs are currently being used in this project, so API limits are not a concern.
- You can monitor API usage in Setup → System Overview, but no special configuration is required at this time.

The screenshot shows the Salesforce System Overview page. The browser address bar displays the URL: `orgfarm-9ccf877550-dev-ed.develop.lightning.force.com/lightning/setup/SystemOverview/home`. The page title is "System Overview" under the "SETUP" menu. The left sidebar contains a search bar and a list of environments, with "System Overview" selected. The main content area is divided into two sections: "Schema" and "API Usage".

Schema	
YOUR CUSTOM OBJECTS + YOUR CUSTOM SETTINGS	3 (0% of maximum 400)
TOTAL CUSTOM OBJECTS + TOTAL CUSTOM SETTINGS	5 (0% of maximum 3,000)
YOUR CUSTOM METADATA TYPES	0 (0% of maximum 200)
TOTAL CUSTOM METADATA TYPES	0 (0% of maximum 350)
CUSTOM METADATA TYPE USAGE	0% (0 of 10,000,000 characters)
DATA STORAGE	

API Usage	
API REQUESTS, LAST 24 HOURS	2 (0% of maximum 15,000)

The bottom of the screenshot shows the Windows taskbar with various application icons, the system clock displaying 12:06 on 26-09-2025, and the language set to ENG IN.
